

Industry Leading Information Solutions

*Offering a full suite of innovative
mortgage lending solutions*

» Optimize Processes and Profitability by Standardizing Workflow

Eliminate variance, reduce errors and proactively control both transactional costs and downstream resource allocation by applying a lender's unique business rules in an automated fashion. Doing so allows an organization to identify outliers that require exception based processing from the majority that fall within parameters that meet defined programs or products.

» Automated Workflow Solutions

Our proprietary workflow technology provides a proven and marketplace tested intelligent solution into the initial phases of the application process. Implement unique business rules and introduce automation into the consumer application workflow. By utilizing our workflow technology, lenders can implement rules around:

- **Identity Validation**
 - » Protects against accessing incorrect credit and initiating costly transactional downstream activity
- **Auto Upgrade**
 - » Ensures intelligent real time assessment of FICO® credit scores
 - » Executes and messages around score thresholds, enabling workflow design
- **Credit Attributes**
 - » Identifies targeted items that can alter process workflow correlated with investor requirements (e.g., bankruptcies, collection accounts)
